

Moses Gitau

STUDENT DEVELOPER | WEB DEVELOPMENT | SOFTWARE PROJECTS | AI & DATA INTERESTS

Kenya | github.com/mosestash124-debug | linkedin.com/in/moses-gitau-246244363

PROFESSIONAL SUMMARY

Mathematics and Computer Science student building practical software projects across web development, data, AI, cybersecurity and emerging technologies. Hands-on project work includes Git/GitHub, Linux, databases and cloud deployment. Currently strengthening full-stack development skills while exploring AI, analytics, cybersecurity and systems design.

EDUCATION

Bachelor of Science in Mathematics and Computer Science

Murang'a University of Technology (MUT), Kenya | 2026-Present

Relevant academic areas: Database Management Systems, database design, discrete and continuous mathematics, programming, computer science fundamentals, and data/analytics concepts.

TECHNICAL SKILLS

Programming	Python, JavaScript, C/C++ fundamentals
Web development	HTML, CSS, JavaScript, responsive design, React project work
Data & databases	MySQL/SQL concepts, database design, data-analysis concepts
Cloud & deployment	Git, GitHub, Vercel, Supabase, deployment workflows
AI & machine learning	Python experimentation, audio analysis, ML concepts
Systems & tools	Linux/Kali Linux, Docker, virtual machines, command line, VS Code
Other	Unity, WebXR, Twilio/SMS concepts, Polygon/blockchain concepts

SELECTED PROJECTS

MajiShwari ? Climate Finance Verification Platform

Kenya-focused platform concept to improve visibility and verification of climate-finance projects through community reporting, dashboards, SMS updates, verification workflows, fund-release logic and geographic visualization.

Technologies:React, Supabase, Twilio/SMS, Polygon concepts, dashboards and mapping

Restaurant / Hotel Client Website

Hospitality website project, including a GitHub-to-Vercel deployment workflow.

Technologies:HTML, CSS, JavaScript, GitHub, Vercel

Farm Milk Buddy

Agricultural/dairy web application concept developed through repository-based workflows.

Technologies:Web development, Git/GitHub, Vercel

WebXR Deployment

Browser-based immersive experience developed and deployed to explore WebXR.

Technologies:HTML, WebXR, Vercel

MOSES GITAU

SELECTED PROJECTS & DEVELOPMENT EXPERIENCE

SELECTED PROJECTS (CONTINUED)

Bioacoustic / Audio ML Project

Python audio-processing work involving mel-spectrogram generation and exploration of bee-versus-wasp sound classification.

Technologies:Python, audio processing, machine-learning concepts

Student Grading System

Academic programming project exploring student grading and comparative data analysis.

Technologies:C

Rental Management System

Rental-management system concept for handling payment information between tenants and landlords.

Technologies:Software development, database/application concepts

Reality Glitch / Creative Web Projects

Creative, interactive web-development experiments published through GitHub.

Technologies:HTML, CSS, JavaScript, Git/GitHub

PRACTICAL EXPERIENCE & DEVELOPMENT

- Built and maintained personal and academic software projects using Git and GitHub.
- Worked through deployment workflows, including GitHub-to-Vercel deployment and troubleshooting build and dependency issues.
- Developed practical Linux skills through Kali Linux, command-line administration, package management, virtualization and Docker.
- Experimented with Unity and WebXR, and explored AI/data applications through Python audio-analysis and machine-learning projects.
- Designed project concepts addressing climate-finance verification, agriculture, student systems and rental management.

INTERESTS & STRENGTHS

Areas of interest: Full-stack development, AI/ML, data analytics, cybersecurity, cloud deployment, database systems, WebXR and technology for social impact.

Core strengths: Problem solving, self-directed learning, rapid prototyping, technical troubleshooting, project-based learning, curiosity and collaboration through Git/GitHub.

CAREER OBJECTIVE

Seeking opportunities to gain engineering experience, learn from experienced developers and contribute to useful products while growing toward full-stack software development and related technology fields.
